EBA consults on the amendment to its technical standards on strong customer authentication and secure communication in relation to the 90-day exemption for account access (EBA/CP/2021/32)

The consultation paper aims at addressing a number of issues that the EBA has identified in the application of this exemption, particularly in cases where ASPSPs have not made use of the exemption and request SCA for each account access, or where they request SCA more frequently than every 90-days, as allowed by the RTS.
